Sunkem International (Private) Limited

Company Profile

2026

Serving a Healthy and Peaceful Life

CERTIFIED ISO 22000 COMPANY

ISO 22000:2018 Certified

ROP-Registered, WHO-Approved Products

Island-wide Service Since 2012

WHO WE ARE

Professional pest management, island-wide, since 2012

Sunkem Pest Control is the trading name of Sunkem International (Private) Limited, a Sri Lankan pest management company established in 2012. We protect large industries, hotels, banks, restaurants, condominiums and homes against termites and all common pests.

Our directors each bring more than 20 years of personal experience in pest management and food-industry quality assurance. With team leaders and around 15 technicians stationed across the regions, we deliver the same standard of service in every province, at competitive market rates.

We believe that controlling pests means more than applying pesticides. Every programme begins with a free site inspection and is built around the site, its risks and its operating needs, using low-toxic products registered with the Registrar of Pesticides and approved by the WHO.

Legal name	Sunkem International (Private) Limited

MISSION, VISION AND VALUES

What guides our work

OUR VISION

To be the leading pest control service provider in Sri Lanka, delivering professional, innovative and integrated pest management solutions that protect homes, businesses and communities while preserving the environment.

Our mission

Responsive service

A quick, experienced and easily contactable team that is professional in every pest control application.

Environmentally responsible methods

Low-toxic chemicals, used safely, with no hazard to customers, commodities, products or the environment.

Reporting and communication

Free site inspections, pre-audit and follow-up reports, and direct discussion with customers on removing pest food, shelter and water.

Our core values

Safety first

Every treatment puts the health and safety of clients, their families and the environment first.

Eco responsible

We champion green methods and minimise our environmental footprint.

Excellence

Continuous training and ISO-certified processes keep our quality high.

Customer care

We listen, respond and go further to ensure complete satisfaction.

Prevention is better than cure. We treat every customer uniquely, providing a tailor-made solution and the best option available for each site.

LEADERSHIP AND TEAM

Experience you can rely on

Our directors and professional staff bring decades of combined expertise from reputed companies in the pest control and food industries.

SP

Mr. Sarath Pathiranage

DIRECTOR

B.Sc. (Agriculture). More than 20 years of pest management experience with three of the main reputed companies in the industry, including overseas training. Spent 14 years with one of them, helping to make it the market leader in termite control with Biflex 10 SE & EC, and initiated the pest management division at another.

AW

Mr. Anura K. Wanigasekara

DIRECTOR

B.Sc. (Agriculture), University of Peradeniya. More than 20 years of experience in quality assurance in the food industry. Holds a Diploma in Household Pest Control and brings deep expertise in food safety and pest management compliance.

MP

Mr. Meraj Pathiranage

MANAGER

Bachelor of Engineering (BE), Computer Software Engineering. Responsible for maintaining the company's ISO 22000 food safety management documentation.

Our workforce

2 Directors

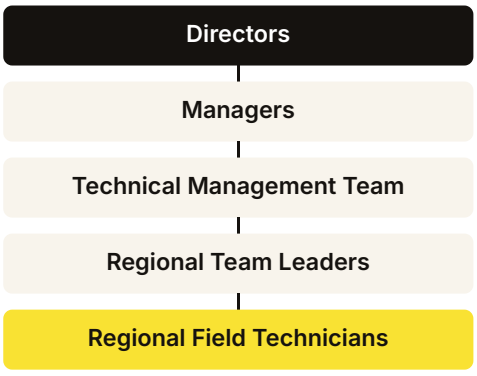

2 Managers

1 Team leader per region

~15 Field technicians

A team leader in each region supervises our field technicians, supported by a technical management team of experienced professionals from reputed pest control companies. All are hands-on, well trained and reliable, and committed to complete customer satisfaction.

Organisation structure

How our people work

Trained specialists

Our team is trained to work in food service, hospitality, healthcare and logistics environments.

Safety on every job

Every treatment follows strict health and safety protocols, with every product applied safely.

Stationed regionally

Each region has its own team leader and technicians, so customers island-wide have a team close to them.

ISLAND-WIDE COVERAGE

Every province, every district

Two offices, regional team leaders and around 15 technicians stationed in different regions let us serve homes and businesses in all 9 provinces and 25 districts of Sri Lanka.

Colombo: Head Office

81/10, 1st Maligakanda Lane, Colombo 10
Serves Colombo and its suburbs, plus Gampaha and Kalutara districts.

Galle: Southern Office and Stores

Rambukella Dispensary Building, Udugama Road, Bataduwa, Galle
Serves Galle, Matara and Hambantota, including villas, hotels and resorts along the south coast.

● Office
● District capital within our service area

Province	Districts covered
Western	Colombo, Gampaha, Kalutara
Southern	Galle, Matara, Hambantota
Central	Kandy, Matale, Nuwara Eliya
North Western	Kurunegala, Puttalam
Sabaragamuwa	Ratnapura, Kegalle
North Central	Anuradhapura, Polonnaruwa
Uva	Badulla, Monaragala
Eastern	Trincomalee, Batticaloa, Ampara
Northern	Jaffna, Vavuniya, Kilinochchi, Mannar, Mullaitivu

Close to your site

Technicians stationed in the regions mean shorter travel and faster attendance.

Free inspections everywhere

Free site inspections are available for homes and businesses island-wide.

One standard, every branch

Customers with several branches receive consistent service and audit-ready reports for every site.

SERVICES

Complete pest management for every site

Termite control
Liquid barrier treatment for pre-construction and existing buildings.

Rodent control
Open and closed bait stations and glue boards, with monthly monitoring.

Cockroach control
Residual spraying and gel baits to eliminate whole colonies.

Ant control
Targeted baits and residual barriers that reach the colony.

Mosquito control
Thermal fogging, mist blowing and treatment of breeding sites.

Fly control
Fogging, mist blowing, fly traps and UV pest traps.

Bed bug treatment
Discreet treatment of all life stages, with a follow-up inspection.

Flea control
Targeted chemical spraying on a monthly programme.

Fumigation
Space and stack fumigation, with certificates for export and import compliance.

Integrated Pest Management
Physical and chemical control for food industries and hospitals.

Inspections and audits
Free site inspections with pre-audit and follow-up reports.

Control methods and recommended frequency

Pest	Method of control	Recommended frequency
Rodents	Open bait stations, closed bait stations, glue boards	Once a month
Cockroaches	Residual spraying and gel baits	Once a month
Ants	Residual spraying and baits	Once a month
Flies	Fogging, mist blowing, fly traps and UV pest traps	Once a month
Fleas	Chemical spraying	Once a month
Mosquitoes	Fogging, mist blowing and chemical application	Once a fortnight
Bed bugs	Isolated fumigation & chemical spray	Twice a year
Termites	Liquid barrier	Based on inspection findings

Most pests breed rapidly and shelter out of sight. We plan each programme around the behaviour and habits of the pest, so that these frequencies keep the population under control.

HOW WE WORK

From first inspection to lasting control

1 **Free site inspection**
We identify the pests, entry points and severity of infestation.

2 **Pre-audit report**
We record the findings and discuss them directly with your team.

3 **Tailored programme**
We recommend the best option for your site, schedule and compliance needs.

4 **Safe treatment**
Trained technicians apply low-toxic, registered products by the right method.

5 **Follow-up audit**
Scheduled visits, monitoring and reports keep the programme effective.

Integrated Pest Management

We do not rely on large quantities of chemicals. Integrated Pest Management (IPM) combines physical and chemical methods with assessment, monitoring and prevention, and removes the conditions that allow pests to survive. This makes it ideal for food industries and hospitals, where the use of hazardous chemicals is restricted.

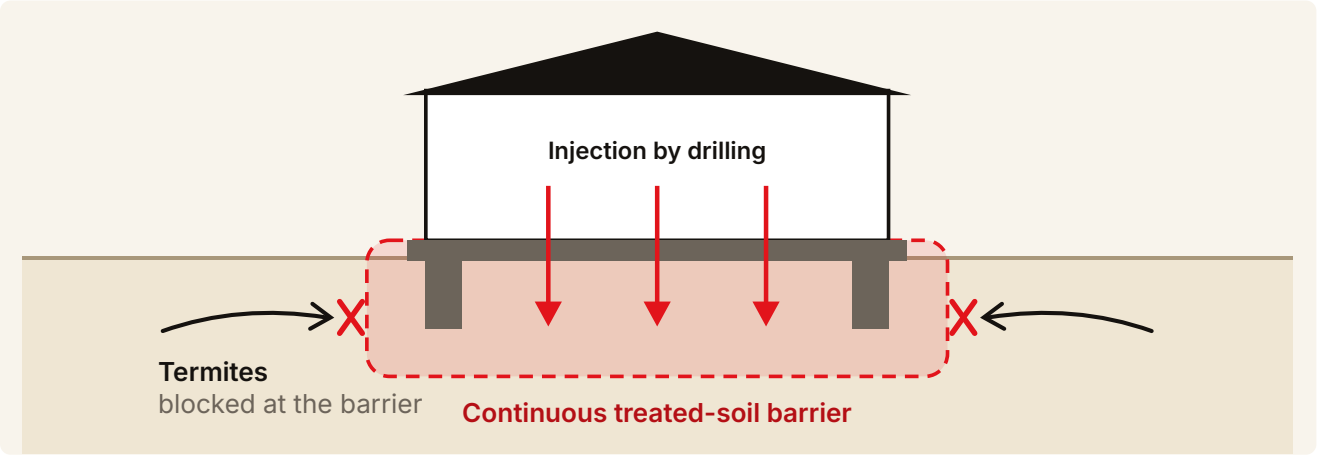

Every pest needs three things. We work with you to reduce or remove them.

Food · Shelter · Water

Termite control: the Liquid Barrier method

Termites are structural pests that can severely damage wooden structures. Visible signs often appear only when it is too late, so early treatment is essential.

Our Liquid Barrier method suits both pre-construction sites and existing buildings. The chemical is injected by drilling at strategic points to form a continuous barrier that termites cannot pass.

Site inspection
We assess termite activity, entry points and the areas at risk.

Barrier application
We drill and inject at strategic points to form the barrier.

Monitoring and follow-up
Regular inspections confirm that the barrier remains effective.

PRODUCTS AND CHEMICALS

Registered, approved and carefully chosen

The products we use are approved by the WHO, registered under the Registrar of Pesticides (ROP) and recommended for domestic and industrial use. We change products periodically to prevent the development of resistance.

Chemical products

Product	Active ingredient or type	Target pests	Application
Biflex 10 SE & EC	Bifenthrin	Termites	Liquid barrier by drilling and injection
Klerat pellets and wax blocks	Brodifacoum	Rats and mice	Open and closed bait stations
Solfac EW 50	Cyfluthrin	Cockroaches and other insects	Residual spraying
Deltamethrin insecticide	Deltamethrin	Cockroaches and other insects	Residual spraying
Cockroach gel bait	Gel bait	Cockroaches	Cracks, crevices and hiding spots
Ant bait	Low-toxic bait	Ants	Along ant trails and at entry points
Pesguard 161 FG	d-Tetramethrin and cyphenothrin	Mosquitoes and flies	Thermal fogging and mist blowing

Non-chemical products and equipment

Glue boards for rats and flies · Tamper-resistant bait stations · Mechanical rat traps · Fly traps · UV pest traps · Electronic fly catchers · Pheromone traps · Ultrasonic pest repellents · Mosquito nets and citronella deterrents · Thermal foggers · Mist blowers

Our standards

- ✓ All chemicals are WHO-approved for domestic and industrial use
- ✓ Products are rotated periodically to prevent pest resistance
- ✓ Closed bait stations are tamper-resistant, and all baits are placed with children and pets in mind
- ✓ All products are registered under the Registrar of Pesticides
- ✓ Non-chemical alternatives are prioritised wherever possible
- ✓ Every treatment follows strict health and safety protocols

Our ISO 22000:2018 certificate. A full-size copy is supplied with this profile.

Registrar of Pesticides

All pesticides we use are registered under the Office of the Registrar of Pesticides, which administers the Control of Pesticides Act No. 33 of 1980.

WHO-approved products

Our chemicals are approved by the WHO and recommended for domestic and industrial use.

Audit-ready programmes

Our programmes are designed to support HACCP, GMP and BRC audits, with full service reports and trend analysis.

Our food safety commitment

We work to stringent food safety standards based on hazard analysis and critical control point principles. We are committed to meeting the requirements of our stakeholders, promoting sustainable practices, and continually improving our system through better technology, processes and people.

Supplied with this profile

- ISO 22000:2018 certificate
- Company licences
- Client list with referee contacts

SECTORS WE SERVE

Programmes built for your industry

From large industries to homes, each programme addresses the specific risks, regulations and operating needs of the sector.

Hotels and resorts
Discreet room-by-room inspection and treatment, kitchen and F&B programmes, perimeter rodent control and outdoor mosquito control.

Restaurants and food service
HACCP-aligned programmes, food-safe gel baits and traps, fly management with insect light traps, and advice on prevention.

Factories and manufacturing
Production-line-safe treatments, protection of raw material stores, GMP and BRC-aligned programmes, and trend analysis reports.

Warehouses and logistics
Rodent baiting and exclusion, fumigation of stored products, bird deterrents and structural termite barriers.

Banks and branch networks
Scheduled service across multiple branches and districts, with consistent standards and reports for every site.

Residential towers and apartments
Scheduled programmes that keep apartment buildings and their common areas clean, safe and hygienic.

Office buildings
Discreet after-hours treatments, low-odour options, targeted pantry and washroom treatment, and common-area mosquito control.

Healthcare facilities
Low-toxicity treatments, protection of pharmaceutical storage, strict compliance protocols and detailed documentation for audits.

Included in our commercial programmes

Compliance ready
Designed to meet HACCP, GMP, BRC and industry audit requirements.

Scheduled plans
Regular visits arranged around your operating schedule.

Industry expertise
Specialists trained in food service, hospitality, healthcare and logistics.

Documentation
Full service reports, trend analysis and audit-ready records.

PROVEN AT SCALE

Multi-site experience, island-wide

7
regions of a national bank's branch network, current contract

8
restaurant outlets of a Colombo group, current contract

40
outlets of a national food retailer, previous contract

Our full client list, covering current and previous customers with referee contacts, is provided as a separate document.

WHY CHOOSE SUNKEM

Professional service at competitive market rates

Competitive market rates
Every quotation is site-specific and follows a free, no-obligation inspection, so you pay a fair market rate for the programme your site needs.

Proven expertise
Directors with more than 20 years of experience each, and staff drawn from reputed pest control companies.

Certified and compliant
ISO 22000:2018 certified, using ROP-registered and WHO-approved products.

Island-wide reach
Two offices, with team leaders and around 15 technicians stationed across the regions, serving all 25 districts.

Rapid response
24/7 emergency response, with same-day availability for urgent pest situations.

Safe, low-toxic methods
An integrated approach that puts prevention first and avoids unnecessary chemical use.

Clear reporting
Pre-audit and follow-up reports, trend analysis and audit-ready documentation.

We stand behind our work
Follow-up visits and service guarantees, because customer satisfaction drives our work.

What our clients say

"We have been using pest control services from Sunkem International for nearly six years. Their team is prompt in attending to our requirements and consistently delivers reliable results. They are easy to work with and highly dependable."

Manager, multinational beverage manufacturer

"Your team consistently demonstrates professionalism, punctuality, and careful attention to detail. We are particularly pleased with the effectiveness of the service and the responsible manner in which the work is carried out."

Villa Manager, south coast resort

"From the initial quotation and communication through to the actual groundwork, the entire process was handled in a very professional, efficient, and responsible manner."

Apartment management, residential building
